10. Mobile App

- 10.1 Getting the App
- 10.2 Mobile-Specific Features

1. Getting Started

1.1 Creating Your Account

Follow these steps to create your W3Link account:

1. Open your browser and navigate to w3link.ai
2. Click "Create Account" on the login page
3. Enter your display name, email address, and password (minimum 8 characters)
4. Accept the privacy policy checkbox
5. Click "Create Account"
6. Check your email for the 6-digit verification code (OTP)
7. Enter the OTP code on the verification screen
8. You are in! You will be redirected to the main chat screen.

[Screenshot: Registration page showing display name, email, password fields and Create Account button]

1.2 Logging In

To log in to your existing account:

1. Navigate to w3link.ai
2. Enter your email and password
3. Click "Sign In"
4. If you have two-factor verification, enter the OTP code

[Screenshot: Login page with email and password fields]

2. The Main Interface

2.1 Sidebar (Left Panel)

The sidebar provides quick access to all your conversations and navigation:

- Your avatar and name at the top
- Search bar to find conversations
- Tab filters: All, DMs, Groups, Tasks, Projects, Favorites
- Conversation list showing name, last message, time, unread badge
- Lock icon on locked chats
- AI badge on Linda and agent chats
- "+" button to start a new conversation
- Bottom navigation: Chats, Tasks/Planner, Announcements, Agents, Settings

[Screenshot: Main sidebar showing conversation list with tabs, search bar, and navigation]

2.2 Chat Area (Center Panel)

The central chat area displays the active conversation:

- Message bubbles: purple for your messages, gray for others
- Sender name and timestamp on each message
- Emoji reactions below messages
- Typing indicator when someone is typing
- Pinned message banner at the top
- Disappearing timer icon next to chat name when active

[Screenshot: Chat view showing message bubbles, reactions, pinned banner]

2.3 Chat Settings (Right Panel)

Access chat settings by clicking on the chat name:

- Click on the chat name to open settings
- Shared media, links, and documents tabs

- Toggle: Favorite, Mute, Lock Chat, Disappearing Messages, Wallpaper, One-Time Media
- Members list for group chats

[Screenshot: Chat settings panel with toggles and media tabs]

3. Messaging

3.1 Sending Messages

Send messages in any conversation:

- Type in the text box and press Enter or click Send
- Attach files using the paperclip icon
- Send voice messages by holding the microphone button
- Send images from camera or gallery

3.2 Message Actions

Long press (mobile) or right-click (web) on any message to access these actions:

- React with emoji
- Reply to message
- Pin/Unpin message
- Star/Unstar message
- Forward to another conversation
- Copy text
- Edit (your own messages)
- Delete (your own messages)

3.3 Voice Messages

W3Link supports voice messaging with AI transcription:

- Hold the microphone icon to record
- Release to send
- Voice messages are automatically transcribed by AI
- Transcription appears below the audio player

[Screenshot: Voice message with transcription text below]

3.4 File Sharing

Share files easily with your contacts:

- Click the paperclip icon

- Select a file from your device
- Supported: documents, images, videos (up to 100 MB)
- Files appear as downloadable cards in chat

4. Voice & Video Calls

4.1 Making a Call

Start a call from any direct message conversation:

- Open a direct message conversation
- Click the phone icon for voice call
- Click the video icon for video call
- Wait for the other person to answer

4.2 During a Call

Call controls available during an active call:

- Mute/unmute your microphone
- Turn camera on/off (video calls)
- End call button

[Screenshot: Call interface with mute, camera, and end call buttons]

5. Stories/Status

5.1 Posting a Story

Share moments with your contacts through stories:

1. Tap the "+" button in the story bar at the top
2. Take a photo or choose from gallery
3. Add text caption (optional)
4. Post your story

5.2 Viewing Stories

View stories posted by your contacts:

- Tap on a contact's avatar in the story bar
- Story opens fullscreen
- Swipe or tap to see next story
- Like or comment on stories

[Screenshot: Story creation screen and story viewer]

6. Linda — Your AI Secretary

6.1 Chatting with Linda

Linda is your built-in AI assistant, available in your conversation list:

- Find "Linda" in your conversation list (marked with AI badge)
- Type any message to Linda in natural language
- Linda can: answer questions, manage tasks, create announcements, post stories, search the internet

6.2 Task Management via Linda

Use natural language to manage your tasks through Linda:

- "Create a task for John to review the report by Friday"
- "What are my tasks?"
- "Mark task #5 as complete"

6.3 Linda Activities Panel

Monitor what Linda has been doing on your behalf:

- In Linda's chat, tap the eye icon in the header
- View Linda's activity log: messages sent, tasks managed, announcements created
- See success rate, activity statistics, and achievement badges

[Screenshot: Linda chat with AI suggestions and activities panel]

7. AI Agents

7.1 The Agent Marketplace

Browse and hire AI agents to enhance your workflow:

- Navigate to the Agents tab in bottom navigation
- Browse available AI agents
- Each agent shows its capabilities and features

7.2 Hiring an Agent

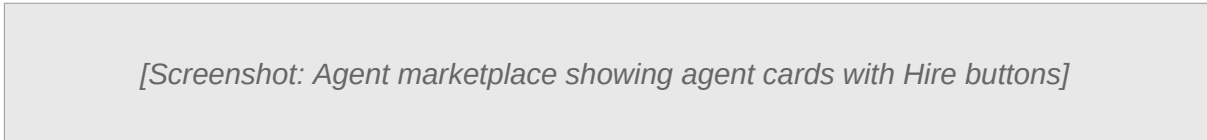

Add an agent to your workspace:

- Click "Hire Agent" on an agent's card
- The agent becomes available in your conversations
- Add agents to specific chat conversations

7.3 TransGuy — Translation Agent

TransGuy provides automatic translation in your conversations:

- After hiring, TransGuy appears in your contacts
- Messages in conversations where TransGuy is added get automatically translated
- Configure source and target languages in chat settings

8. Task & Project Management

8.1 The Planner Page

Manage all your tasks visually:

- Navigate to the Planner tab
- View tasks in Kanban board format
- Drag and drop tasks between columns (To Do, In Progress, Done)

8.2 Creating a Task

Create a new task with full details:

- Click "Create Task" button
- Fill in: title, description, assignee, due date, priority
- Add to a project (optional)
- Add checklist items
- Click Save

8.3 Projects

Organize work into projects:

- Navigate to the Projects section
- Create new projects with team members
- View project roadmap (Gantt chart)
- Each project has its own chat room

[Screenshot: Kanban board with task cards and project view with Gantt chart]

9. Settings

9.1 Profile Settings

Customize your profile and app preferences:

- Click Settings in the bottom navigation
- Update your display name, bio, and avatar
- Change password
- Toggle dark mode

9.2 Chat-Specific Settings

Each chat has individual settings you can customize:

- Open any chat settings panel
- Favorite: Add chat to favorites tab
- Mute: Silence notifications
- Lock Chat: Set a PIN to protect the chat
- Disappearing Messages: Set auto-delete timer
- Wallpaper: Customize chat background color

[Screenshot: Settings page showing profile options and theme toggle]

10. Mobile App

10.1 Getting the App

Access W3Link on your mobile device:

- The W3Link mobile app is available for both iOS and Android
- Download from your organization's app distribution

10.2 Mobile-Specific Features

The mobile app includes all web features plus:

- All features from the web app are available
- Biometric unlock for locked chats (if supported by device)
- Push notifications for new messages and calls
- Camera integration for photos and voice messages

[Screenshot: Mobile app showing conversation list and chat screen]
